Management of Rectal Cancer: The Challenges and Changes Ahead

DR TAKASHI AKIYOSHI

Dr Akiyoshi is a Consultant Surgeon in the Department of Gastroenterological Surgery, Cancer Institute Hospital of Japanese Foundation of Cancer Research (JFCR), Tokyo. His area of specialty is laparoscopic surgery, especially laparoscopic advanced and extended surgery for colorectal cancer.

He has published many papers on extended surgery including lateral lymph node dissection for rectal cancer, total pelvic exenteration for locally advanced/ recurrent rectal cancer, and multi-visceral resection for colorectal cancer.

His interest is in translational research, especially in the prediction of the response to preoperative chemoradiotherapy in rectal cancer. He has been awarded with many research grants and is an invited faculty at multiple international meetings.
